EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gregory B. Butler on Thursday, July 14, 2005.

1. The application has been amended as follows:

In claim 1, on line 3, delete "a) a horizontal platform" and insert --a) an elongated horizontal platform having a top surface, a forward end, a rearward end and a longitudinal axis that divides the platform in half;--

In claim 1, on line 4, delete "paths;" and insert --paths disposed on the top surface;--

In claim 1, after line 5, insert --d) a chest support mounted to the platform near the forward end--

In claim 1, on line 7, delete "mechanism." and insert --mechanism wherein the defined curvature guide paths are non-looped and are in a substantially symmetrical, horizontal and mirror-image arrangement to one another, each of which curves outwardly from its respective forwardmost end and curves inwardly from its rearmost end such that each curve is convex relative to the longitudinal axis.--

Claims 2, 4 and 9 are cancelled.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

In view of the applicant's amendments and after further consideration of the invention, the claims as presented avoid the prior art of record. The prior art does not disclose an exercise apparatus for simulating ice skating movements wherein the apparatus includes an elongated horizontal base having a longitudinal axis that divides the base in half, a chest support, two curved non-looped guide paths disposed on the base, pedal assemblies moveably coupled to the guide paths and a variable resistance mechanism. In particular, the guide paths are in substantially symmetrical, horizontal and mirror-image arrangement relative to each other such that the curves are convex relative to the longitudinal axis.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Park '582 and Flament '430 disclose exercise devices having a platform that include curved pathways.

Bullock '511 and Tissue '442 each disclose exercise devices having horizontal platforms with straight pathways.
